

05/03/2015

YOU NEED:

- Vegetables (for example lemons or potatoes)
- Zinc nails
- Copper nails or wires
- Little clamps
- A tester
- A led

PROCEEDING:

Put in a vegetable one zinc nail and a copper wire, so that they don't touch.
Do it for more vegetables and then link copper to zinc of another unit.
Test the potential with a tester and then try to link the battery to a led.

LIGHT UP A BULB WITH VEGETABLE
